

Machines Kennes is one of the leading rebuilder of pre-owned Multivac® packaging machines to the Food and Medical Industries. Whether you're looking to upgrade your Multivac® packaging system or purchase one of our rebuilt machines, Machines Kennes has the solution to meet your specific needs. Every machine starts with a complete rebuild, replacing all pneumatic and electrical components. The OEM computer system can be replaced with a modern Siemens Step 7 system with color Touch Screen.

Our in-house design and fabricating facilities allow us to re-design the existing machine's frame (length and width) to accommodate the new package tooling and cutting systems.

We design and fabricate all of our tooling in-house using 3 high modern CNC machinery.

Our parts department maintains a comprehensive stock of replacement items, most orders ship same day.

Our well-trained service staff installs and will maintain your packaging machine to assure it's always in top operating condition.

We are NOT! MULTIVAC dealer but can give you all the service / information required on the machine. We always have several thermoforming machines from stock. By the various offerings we can always help with an appropriate machine. Do not hesitate to ask for information from us. This by phone or through the mail.
